

# Remote Workforce Analytics

Whether remote work is new to your organization or you've been doing it successfully for years, your employees have likely experienced both the benefits and the challenges of getting things done away from the office.

## Important questions to ask when implementing a remote workforce:

- How can the capacity to work remotely be measured and understood?
- How can leaders adjust their management style to help employees succeed in a remote environment?
- How can data and talent analytics assist in making good decisions for your organization?

Harrison has developed specific Remote Work Behavioral Competencies to help organizations maximize performance and meet the challenges of working in a remote environment. Using our unique behavioral competencies framework, we have developed two new competencies for **Remote Productivity** and **Remote Communication**.

There are two versions of the competencies: One for remote workers and the other for leaders who manage remote workers.

**Remote Workers** - can compare their own behavioral tendencies to those that are most likely to produce positive outcomes.

**Leaders of Remote Workers** - can gain insights into their own management style and potential adjustments that will benefit team members and organizational performance.

# Remote Workforce Analytics

## Different People = Different Challenges

While many people enjoy working remotely and do so successfully, a multitude of challenges can make it quite difficult for others:

- Requires self-discipline
- Possible lack of structure
- Lack of social contact and potential feelings of isolation
- Overwork/stress from not being able to switch off
- Difficulty prioritizing tasks
- Managing different kinds of interruptions from family, children, pets
- Adapting to new technology and associated outages
- Managing physical and mental health
- Lack of clarity in deliverables

## Analysis - Identifying Development & Training Needs

### The Remote Worker Analysis Reports target three distinct areas:

1. The Remote Work Behavioral Competencies which identify traits needed for effective remote productivity and communication.
2. The Behavioral Success Analysis Report identifies an individual's fit with the job which is the primary foundation for successful remote working.
3. The Engagement and Retention Report assesses the individual's level of engagement which is also a foundation for successful remote working.

## Brandon Hall Award Winner

We were proud to be acknowledged as a winner of the Silver award for Innovating Remote Workforce Analytics in the category of Best Advance in Technology Innovation for the Remote Workforce.

## Harrison Talent Life Cycle Solutions

Harrison Assessments uses predictive analytics to help organizations acquire, develop, lead and engage their talent. This comprehensive Talent Decision Analytics provides the intelligence needed throughout the talent life cycle to build effective teams and develop, engage and retain key talent. Contact us to learn how we help organizations make great decisions.
